The Aqua Frog & Aqua Fish

Statuary UV & Spitter All In One!

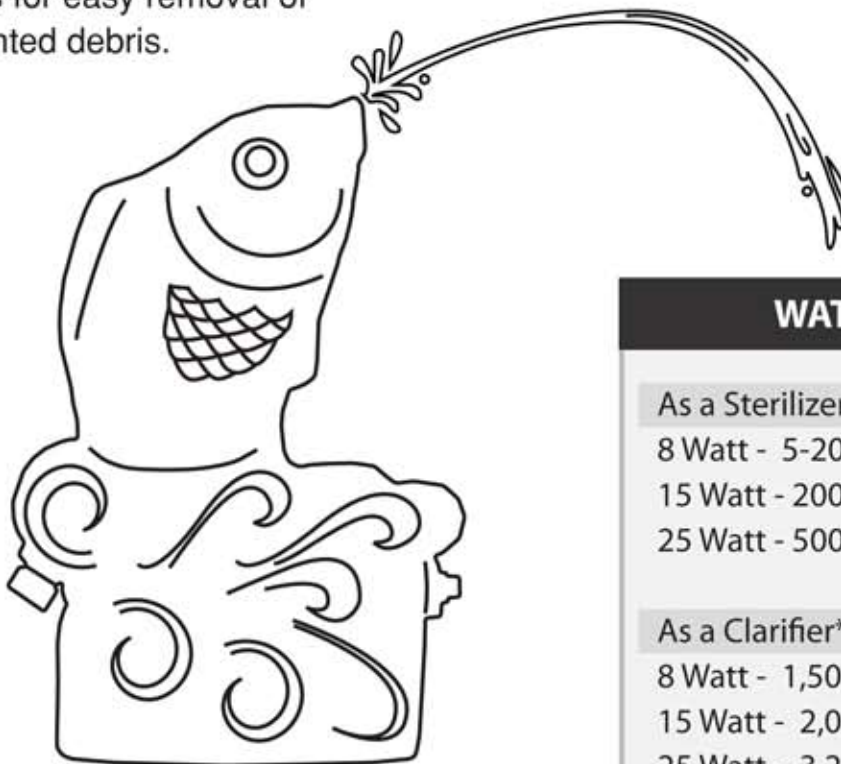

The Aqua Frog and Aqua Fish are unique: they can sit on the edge of any pond and give you crystal clear water. Each unit contains a special ultraviolet lamp surrounded by a quartz sleeve to ensure your pond will stay clear. The Aqua Frog and Fish UVs can be connected to any submersible pump or existing filter for easy installation. Safety is important to us, therefore all Aqua Frogs and Fish are UL and cETL listed. Each has a 15 foot electrical cord. These units are outfitted with two 3/4" inlets, one in the front the other in the back so you can place either unit at any angle. Both units are equipped with a barb fitting so you can connect to either a 3/4" or 1/2" hose. A 2" clean out on the bottom allows for easy removal of unwanted debris.
